

SHARKS TEETH RAMP

FLOW PLATE CONFIGURATIONS

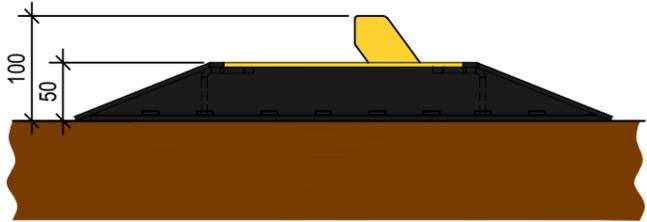

Plan view of road

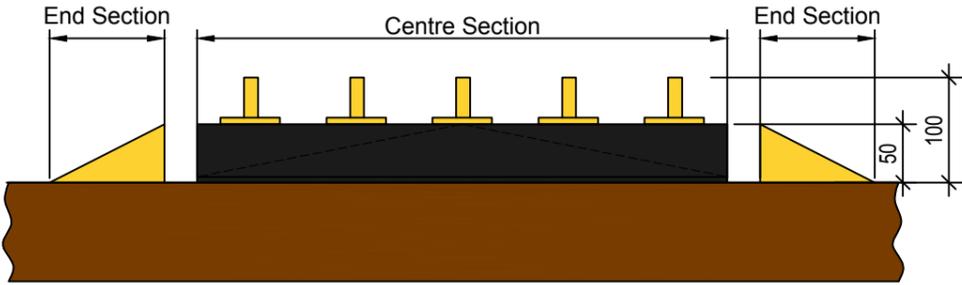

- Suitable for both cars & HGV's
- Each Tooth has its own spring for durability
- Individual cartridge houses each tooth, making it easy to maintain as each cartridge can be replaced easily without removal of the ramp
- Heavy Duty Chequer Plate powdercoated in highly visible Black and Yellow
- Built in ramp acts as a 10mph traffic calmer
- Modular design to build ramp width as required
- End sections sold separately and bolt on
- Surface mounted – no need for drainage channel
- 4 no fixing holes per plate
